PROFILE SUMMARY

Full-Stack Developer and AI Engineer with experience building production-ready web, mobile, and embedded systems. Skilled in MERN, Flutter, RAG architectures, AWS cloud services, and workflow automation, with hands-on experience developing AI-powered applications, voice-enabled experiences, secure authentication systems, CI/CD pipelines, and Raspberry Pi and ESP based devices.

PROFESSIONAL EXPERIENCE

Naptick | AI Engineer

Mumbai | from January 2026 - Present

- Developed Raspberry Pi firmware with boot scripts and GPIO controls and built a BullMQ push notification system for scheduled and real time events, enhancing user engagement and architected a shared tools layer for reusable logic across chat, voice, and device services.
- Developed and maintained Flutter app features including chat experiences and architected GitHub Actions CI/CD pipelines with AWS Secrets Manager to automate deployments and enhance security.

Naptick | AI Engineer Trainee

Mumbai | from July 2025 to December 2025

- Engineered and launched the company's primary website and a full-stack MERN waitlist platform, integrating Stripe and Razorpay payment systems alongside automated onboarding emails and referral links to streamline user acquisition and engagement.
- Automated social media workflows using n8n and AI-driven pipelines, adding intelligent search, deep research, and voice interactions, while also building the app's authentication system (email/password, Google OAuth, Apple OAuth) to enhance user experience and innovation.

PROJECTS

BoneScan | *Deep Learning Web App for Bone Fracture Classification* | [Github](#) | [Live Demo](#)

- Developed a deep-learning image classifier using TensorFlow and Keras, combining a pre-trained VGG16 backbone for feature extraction with a custom classification head to distinguish oblique and spiral fractures from bone X-rays in real time.
- Built a responsive Flask web interface and live confidence visualization, containerized the model with Docker and deployed it as a shareable, interactive demo on Hugging Face Spaces.

BookHub | *Development Project* | [Github](#)

- Developed a secure and scalable book review platform with advanced search, post, and CRUD functionality.
- Integrated JWT authentication, role-based access control and MongoDB for secure and scalable data management and implemented toast notifications for instant user feedback.

TECHNICAL SKILLS

- **Languages:** Python, Java, C/C++, JavaScript, SQL.
- **Frameworks and Libraries:** React.js, Node.js, Next.js, NestJS, Flutter, Hugging Face, TensorFlow.
- **Databases and Cloud:** MongoDB, Redis, AWS (SQS, EC2, Secrets Manager, Bedrock), ChromaDB.
- **DevOps, AI & Tools:** Git, GitHub Actions (CI/CD), npm (package author), Webhooks, NLP, RAG, Model Fine-Tuning, STT/TTS models, n8n, Firebase, OAuth, Google (Analytics, File Search).
- **Embedded Systems:** Raspberry Pi, GPIO Programming, Python Firmware Scripting.

EDUCATION

Rizvi College Of Engineering

2021-2025

Bachelor of Engineering in Artificial Intelligence and Data Science

(CGPA – 8.1/10)

CERTIFICATIONS

- Honors/Minor in Artificial Intelligence & Machine Learning
