PROFILE SUMMARY

AI Engineer with experience building production ready AI systems across LLMs, Computer Vision, and autonomous AI agents. Skilled in RAG architectures, AI orchestration, scalable backend services, workflow automation, and AWS cloud technologies, with hands-on experience developing AI powered applications, semantic search systems, and voice enabled experiences.

PROFESSIONAL EXPERIENCE

Freelance|Full-Stack Engineer (Contract) — Keystone Vacations **Mumbai | July 2026 - Present**

- Architected and built a cross-platform mobile application in Flutter that serves three distinct role-based experiences, field sales agent, customer, and administrator, backed by a NestJS and Firestore service on Google Cloud Run.
- Engineered a derived nights-entitlement ledger that cannot drift from the underlying bookings, server-side PDF contract generation, and DPDP-aligned data handling with Aadhaar minimisation and encrypted document storage, validated by 1,310 automated tests.

Naptick | AI Engineer **Mumbai | January 2026 - Present**

- Architected a shared tools layer for reusable logic across chat, voice, and device services, while developing Raspberry Pi firmware with boot scripts, GPIO controls, and a BullMQ based push notification system for scheduled and real time events.
- Developed AI powered chat experiences within a Flutter application and architected GitHub Actions CI/CD pipelines with AWS Secrets Manager to automate secure deployments.

Naptick | AI Engineer Trainee **Mumbai | July 2025 to December 2025**

- Automated AI driven content generation and workflow pipelines using n8n, integrating intelligent search, deep research, and voice interactions to streamline content creation.
- Built secure authentication systems (Email/Password, Google OAuth, Apple OAuth) and engineered the company's MERN based waitlist platform with Stripe, Razorpay, automated onboarding, and referral workflows.

PROJECTS

SARTOR | *Explainable Formal Attire Detection using YOLO26* | [GitHub](#) | [Live Demo](#)

- Trained and fine-tuned a custom YOLO26 object detection model on a curated Fashionpedia dataset to accurately detect multiple garment classes for real time formal attire analysis.
- Developed an explainable computer vision pipeline by combining YOLO26 object detection with a rule based reasoning engine for real time image, video, and live webcam inference.

TECHNICAL SKILLS

- **Languages:** Python, Java, C/C++, JavaScript, SQL.
- **Frameworks and Libraries:** React.js, Node.js, FastApi, OpenCV, Flutter, Hugging Face, TensorFlow.
- **Databases and Cloud:** MongoDB, Redis, AWS (SQS, EC2, Secrets Manager, Bedrock), ChromaDB.
- **DevOps, AI & Tools:** Git, GitHub Actions (CI/CD), Docker, AI Agents, Computer Vision, Object Detection, CNN, Transfer Learning, NLP, RAG, Model Fine-Tuning, STT/TTS models, n8n.
- **Embedded Systems:** Raspberry Pi, GPIO Programming, Python Firmware Scripting.

EDUCATION

Rizvi College Of Engineering

2021-2025

Bachelor of Engineering in Artificial Intelligence and Data Science

(CGPA – 8.1/10)

CERTIFICATIONS

- Honors/Minor in Artificial Intelligence & Machine Learning
